

OTAY RIVER WATERSHED MANAGEMENT PLAN

GOALS

AS APPROVED ON CONSENSUS BY THE
WORKING GROUP/PROJECT TEAM ON
MAY 5, 2005

At its meeting of May 5, 2005, the Otay River Watershed Management Plan (ORWMP) Working Group/Project Team decided by consensus that the ORWMP list the following Goals:

1. Protect, enhance, and restore watershed resources
2. Ensure reasonable, sustainable, and compatible economic development
3. Provide educational and recreational opportunities
4. Ensure public health and safety
5. Maximize integration of existing Programs and Plans that affect the resources of this watershed

The previously listed Objectives and Action Items will be included in the text of the Plan under the appropriate Goal listed above, however, they will not be called out or identified as Objectives or Action Items.

The Working Group/Project Team will comment on the Draft Watershed Management Plan rather than continuing to wordsmith the objectives and action items at the monthly meetings in preparation for the Executive and Policy Committee meetings to be held in June 2005.

The Working Group/Project Team also requested that the key terms in the ORWMP be indexed to make it easier for the Group to verify and identify the key points under each Goal.
